Meet the captivating range of _____
LG French Door Refrigerators created to
transform your life and interiors with a powerful
combination of technology and design.

Design

Exterior

LG InstaView™

The stylish glass panel gives you a clear view when you knock twice. With more visibility, you can easily find your favorite snacks and drinks and access them faster.

Aesthetics

This four-door refrigerator comes with a premium glass finish that adds style and elegance to your kitchen. Its Open Wave Pocket Handles let you open the doors with just a light touch, leaving behind no fingerprints.

Interior

Metallic Decoration

The interior drawers and walls have a sleek metal finish that adds a touch of elegance and durability, making the inside of your refrigerator look just as stunning as the outside.

Convenience

Bigger Fridge Section, Better Freshness

With a massive 610 liter capacity, this four-door refrigerator gives you 436 liters of fridge space and 174 liters of freezer space - perfectly balanced at a 70:30 ratio. So now you get more room for fresh food, without compromising on frozen storage.

70%
Fridge

30%
Freezer

*LGE French Door series (GV-#25FF) Fridge room's capacity is 70%+ compared to other LG French door model (GR-#24F), (GV #25FF) fridge capacity is bigger. Note: # denotes product features as per LG nomenclature.

Water Dispenser (Non-Plumbing)

The built-in Water Dispenser blends style and convenience, giving your refrigerator a modern look. Get easy access to fresh water whenever you need without opening the door!

FRESHConverter+™

You don't need to worry about calculating the right temperature for different food items. With the new FreshConverter+ feature, you can easily adjust the temperature - just select meat, fish, or vegetables on the I-Micom panel. It automatically adjusts the temperature to keep each ingredient at its ideal freshness level.

*The temperature setting can be changed by pressing the select button. There are three different modes: Meat, Fish, and Vegetable.

Fresh Tray

The new Fresh Tray is designed to dedicate food items just the right space so they stay fresh for longer. It can easily be placed above the shelf, below it, or even inside the vegetable box, depending on what suits your storage needs.

Separate Baskets For Fruits & Vegetables

Keep your fridge more organized with two separate baskets - one for fruits, one for vegetables. This smart storage design makes everything easier to find and helps your groceries stay fresh for longer.

Auto Ice Maker (Non-Plumbing)

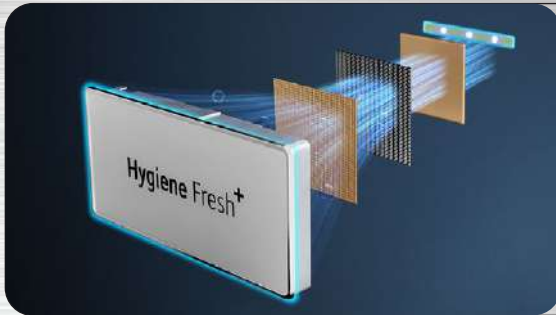

Enjoy the convenience of ice on demand without the hassle of plumbing. Just remove the water tank, fill it up, and let the Auto Ice Maker do the rest. Enjoy perfectly uniform ice every time!

Freshness

HygieneFresh⁺™

HygieneFresh⁺™ maintains an utmost hygienic environment inside the refrigerator by reducing 99.99%* bacteria activity and eliminating acidic & alkaline odors.

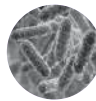

Up to
99.99%*
Reduction in Activity of Bacteria

**4 Typical
Bacteria**

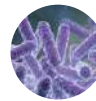

Staphylococcus
aureus

Escherichia
coli

Listeria
monocytogenes

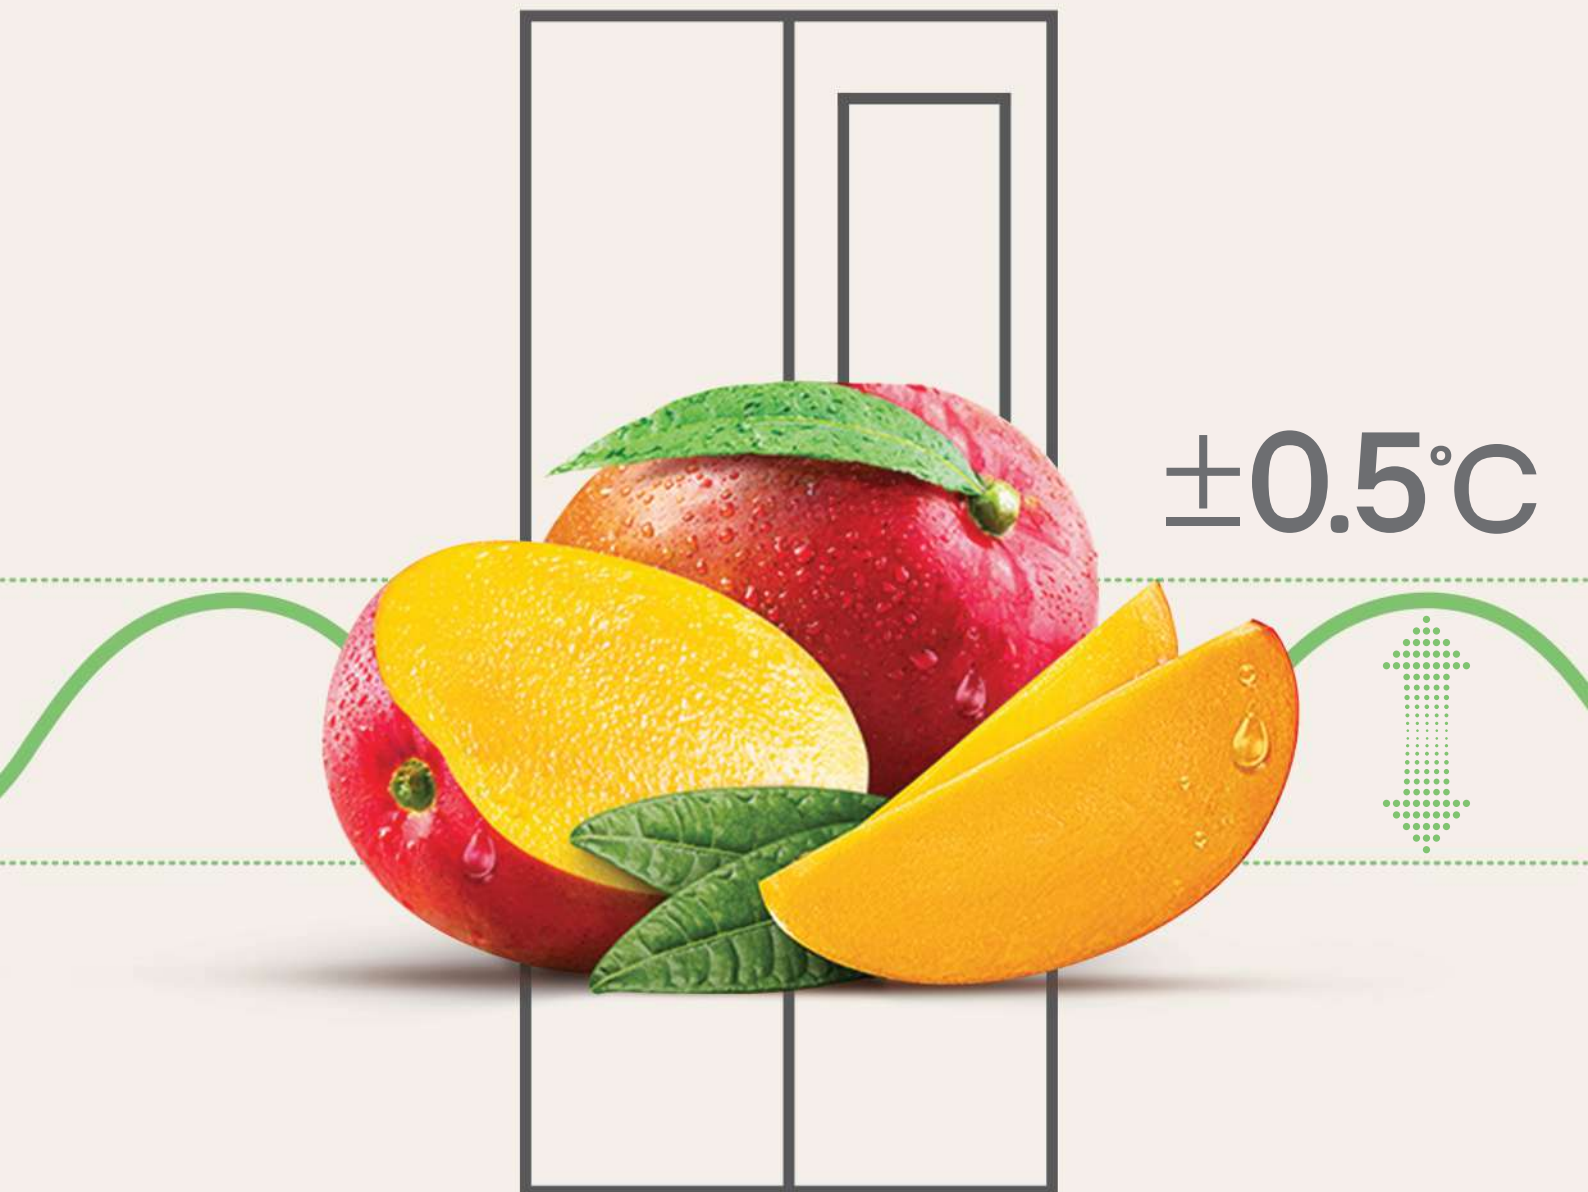

Klebsiella
pneumoniae

Hygiene Fresh⁺

*Bacteria used in the test: Staphylococcus aureus, Escherichia coli, Bacillus cereus, Klebsiella pneumonia. *The number of bacteria was counted before and after a four hour reaction made by the injection of the 0.2 ml bacterial solution into the antibacterial filter with UV LED module. Bacterial removal performance is the laboratory test result where direct interactions were observed. *This figure represents the bacteria removal performance of the filter. *Tested by TÜV Rheinland, based on LG's internal test method referring to the ISO27447 (=JIS R1702). *Results may vary in real use conditions. *The product image is for illustrational purposes only and might differ from the real product.

LinearCooling™

Cooling is powerful only when it's consistent. LG LinearCooling™ reduces temperature fluctuations to just $\pm 0.5^{\circ}\text{C}$, keeping food fresh for longer.

*Based on TÜV Rheinland test results using LG's internal testing method of measuring average peak to peak temperature fluctuation in the fresh food compartment of LGE model LFB61BLGAI. No load and normal temperature setting. The result may vary in actual usage. *Based on TÜV Rheinland test results using LG's internal testing method measuring the time it took to reach the 5% weight reduction rate of pak choi on the shelf of the fresh food compartment of the LGE LINEARCooling model LFB61BLGAI. The result may vary in actual usage. *Applicable models only.

Metal Fresh

The interiors of the LG French Door Refrigerator are designed as elegantly as its exteriors. Its Metal Fresh panels reflect modern elegance in every detail, while retaining cooling for long hours. Truly, the best of form and functionality!

Metal Fresh

DoorCooling+™

LG's DoorCooling+™ technology delivers cool air more evenly and quickly than conventional systems. It helps keep food fresh and drinks cold - even in the door compartments - so every shelf stays perfectly chilled.

Multi Air Flow

LG's Multi Air Flow system uses multiple air vents to distribute cool air evenly throughout the refrigerator. This ensures faster, consistent cooling in every corner - so your food stays fresh, no matter where it's placed.

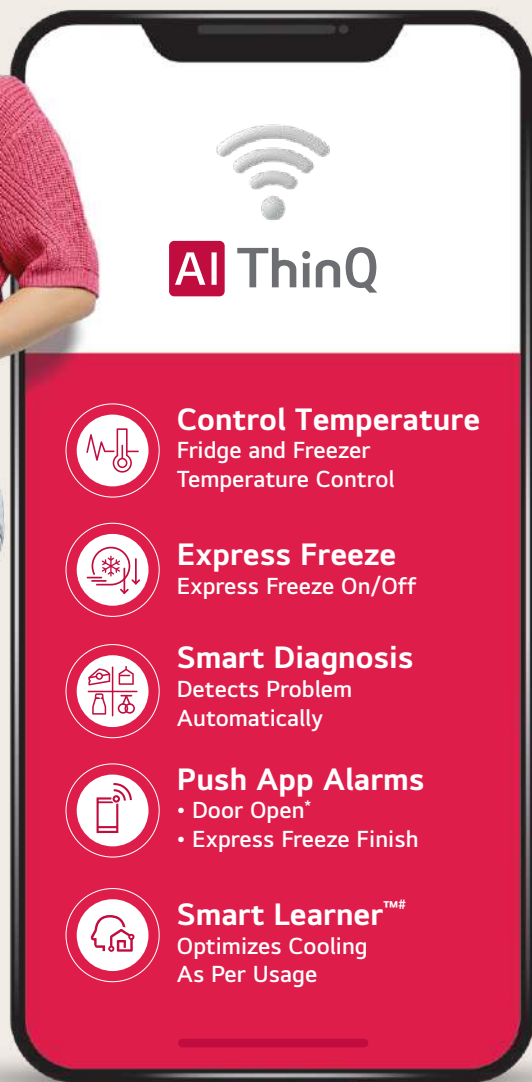

*Based on TÜV Rheinland test results using LG's internal testing method comparing time for the temperature of the water container placed in the top basket to drop between DoorCooling+ vent closed and opened condition. DoorCooling+ is supposed to stop when the door is opened. The result may vary in actual usage.
*This image has been created to aid consumer understanding.

Smart Connectivity

Powered By

AI ThinQ with WiFi

Stay close even when you are far away.

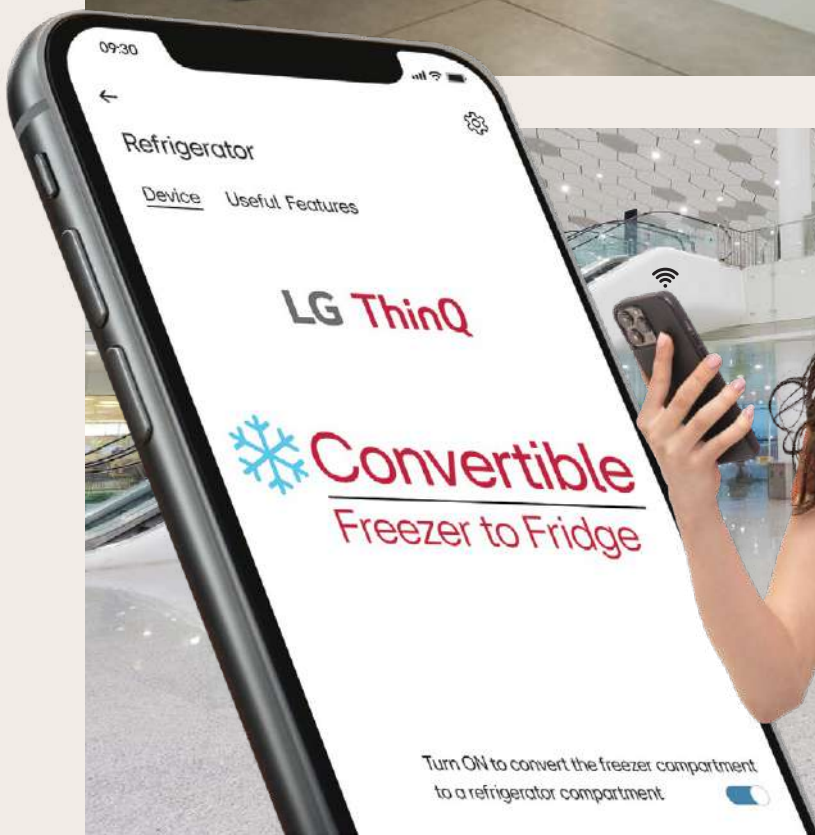

Presenting

Wi-Fi Convertible

Convert freezer to fridge from anywhere!

With LG's Wi-Fi Convertible feature, you can switch your freezer into a fridge remotely using the AI ThinQ app. Whether you're at the office, on a trip, or just away from home, enjoy the flexibility and peace of mind by adjusting your fridge to suit your needs - right from your phone.

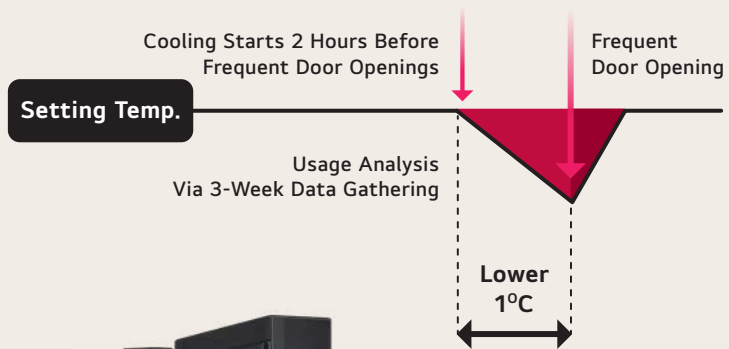

Smart Learner™

LG's Smart Learner technology studies how you use your refrigerator over time by tracking your habits for three weeks. It then automatically adjusts cooling and energy usage to match your routine, giving you better performance and greater efficiency without any effort.

Smart Fresh Air

Applies algorithm to analyze usage pattern and optimizes temperature.

Smart Fresh Air Algorithm

Smart Diagnosis™

LG's Smart Diagnosis makes it easy to identify and fix issues with your refrigerator. Just use the AI ThinQ app to run a quick check - it will analyze performance and offer possible solutions, saving you time and unnecessary service visits.

Express Freeze

With just one press, Express Freeze activates quick freezing across the entire refrigerator, helping you cool items faster. It works on its own and automatically turns off after a set time, giving you quick results without any extra effort.

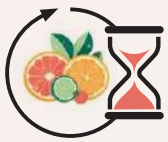

Energy Efficiency

Smart Inverter Compressor™

LG's Smart Inverter Compressor adjusts cooling based on the fridge's contents - using only the energy needed. Unlike regular compressors that run at full power all the time, it saves energy, keeps food fresh, and helps cut down electricity bills - all while being better for the planet.

**Long-Lasting
Freshness**

**More Energy
Saving**

**10 Year Warranty
