Presenting the range of
LG Smart Washing Machines

SEPERATE WASH. SPECIAL CARE.

THE 2-IN-1 WASH

With LG TWINWash™, you can separately wash two different types of laundry at the same time. Just put the tough load in the main washer above and the tender load in the mini washer below.

LESS VIBRATION. LESS NOISE.

The Inverter Direct Drive Motor in LG TWINWash™ enhances washing performance but without making any noise. This technology uses fewer moving parts, which reduce vibrations and enhance durability.

TRUE STEAM. TRUE CARE.

Steam™ technology activates Allergy Care, Steam Refresh and Steam Softener™. Together they all work towards giving you allergen-free clothes, which are an ideal solution for babies' and sensitive skin.

GERM - FREE CARE

99.9%

LG TWINWash™

What is LG TWINWash™?

LG TWINWash™ is a combination of two washers in one. You can operate both washers at the same time or independently as required.

What is LG TWINWash™ Good For?

SEPARATE WASH

With LG TWINWash™, you can separately wash two different types of laundry. Just put one load in the main washer above and another in the mini washer below. You can simply prevent colour stains, fabric damages, etc.

SIMULTANEOUS WASH & SPIN

Save your total laundry time even when you wash sorted laundry. Just wash one load in the main washer above and another in the mini washer below at once. No need to wash clothes one by one anymore.

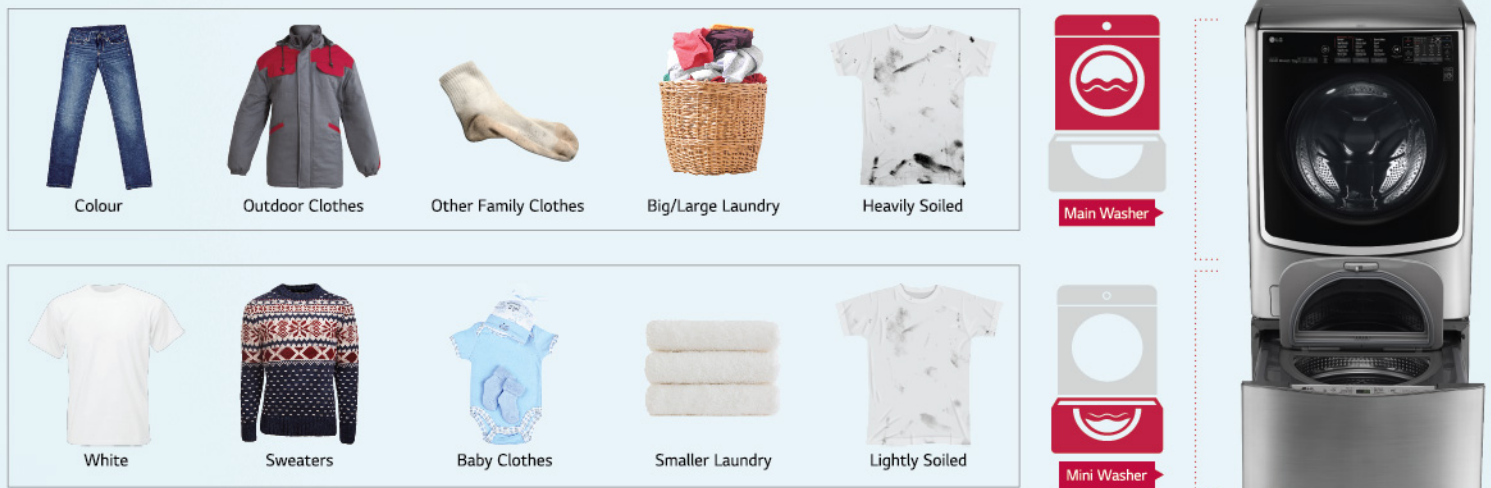

ALL-IN-ONE

Have it all; a powerful washer dryer combo and an efficient mini washer in one. You can maximize total washing capacity up to 24.5 kg plus 12 kg dryer as well.

How Can I Wash Two Loads At The Same Time?

According to a recent research around the world, over 80% people said they wash clothes separately to prevent colour stains, fabric damages, allergies and so on. But also, many people agreed that separately washing laundry is the most annoying job because it takes more time. With LG TWINWash™, you can wash sorted laundry separately, yet simultaneously. Keep whites white, colors bright and always have clean clothes.

DISCOVER THE SMARTEST WAY OF WASHING.

DIRECT DRIVE

The Inverter Direct Drive Motor in LG Front Load Washing Machine enhances washing performance but without making any noise. This technology uses fewer moving parts, which reduce vibrations and enhance durability.

STEAM - 99.9% GERM FREE

Steam™ technology activates Allergy Care, Steam Refresh and Steam Softener™. Together they all work towards giving you allergen-free clothes, which are an ideal solution for babies' and sensitive skin.

GERM - FREE CARE
99.9%

LG ThinQ

LG ThinQ technology helps you operate or monitor your laundry from anywhere, anytime.

LG ThinQ

LESS VIBRATION, LESS NOISE

Not just one but two high-efficiency Inverter Direct Drive motors enhance washing performance but without the noise. Inverter DD technology uses fewer moving parts, which reduce vibrations and enhance durability. Plus, the motors dissipate less energy, reducing electricity consumption.

CONVENTIONAL MOTOR

More friction caused by pulley and belt that causes more noise & vibration which leads to less durability

LG INVERTER DIRECT DRIVE

The drum and motor are connected directly which leads to less noise & vibration and, more durability

WASH WITH COMPLETE CARE

Every fabric needs a special wash and the 6 Motion Direct Drive in LG Washing Machines delivers a seamless experience each time.

TUMBLING

A standard motion in all washing machines, tumbling works for all types of clothes.

SCRUBBING

As an intensive wash cycle, scrubbing dissolves detergent quickly and works strongly on tough stains.

FILTRATION

While it soaks bulky laundry faster and thoroughly, filtration is made for a big wash.

ROLLING

We call it the Silent Wash and it's not just effective but kinder too. Because, it rolls the laundry below water level and causes no damage to the clothes.

STEPPING

No more wrinkles on your shirts. Stepping is just like wrinkle care that prevents creases and ensures no damage to fabrics.

SWING

Designed for the delicate, the swing motion ensures smooth drum action which prevents fabric damage and creasing.

LG ThinQ (Works on Wi-Fi)

BE AT HOME, WITHOUT BEING AT HOME.

Control & monitor your washer anytime, anywhere, with just One App (Wi-Fi only)

How to use?

- 1 Open **LG ThinQ** Application
- 2 Press Start Button
- 3 Simply Choose a Washing Course

Remote Control & Monitor

Monitor and control your smart Washing Machine from anywhere.

Push Alerts

Notifies when cycle is completed or error occurs on the Washing Machine.

Download Cycle

Downloads new cycles to the Washing Machine.

Smart Diagnosis™

It allows you to troubleshoot the Washing Machine.

Tub Clean Coach

Alarms when it is time to clean the tub.

Energy Monitoring

Checks energy usage for recent cycles and for the month.

FAST & CLEAN WASH

TurboWash™ trims the time of a regular wash program down to 59 minutes, reducing water and energy usage. It sprays water directly onto fabrics for approximately 120 seconds, making the already impressive rinse cycles even more efficient than ever before.

TurboWash™

Cotton cycle with TurboWash™

15% Energy Saving, 40% Water Saving

* Tested by Intertek; Cotton Cycle with TurboWash™ option is finished within 59 ±5% minutes.

* Tested by Intertek; Based on Cotton cycle/40°C/1400rpm, comparison between 'with TurboWash™' and 'without TurboWash™'.

** The washing performance result within ±10% and the rinsing performance result within ±5% against Cotton cycle without TurboWash™ option.

99.9*% GERM FREE WASH

Steam™ technology activates Allergy Care, Steam Refresh and Steam Softener™. It improves your quality of life by maintaining a healthy, allergen-free environment; which in turn makes it ideal for babies and sensitive skin.

ALLERGY CARE
Defeats invisible allergens

STEAM REFRESH
Reduces wrinkles and odor
in 20 minutes

STEAM SOFTENER™
Softens your clothes
with pure water

5-STAR WASHING MACHINES

LG Washing Machines qualify the norms of Bureau of Energy Efficiency of India with 5-Star Ratings (Labels). Created with the best technology, our wide range of washing machines not only saves water and electricity, but also provides the best washing quality.

*99.9% Germs reduction certified by TUV-SUD

GENTLE ON CLOTHES, HARSH ON STAINS.

SMART INVERTER MOTOR

LG Top Load Washing Machine comes with Smart Inverter technology which saves your 36% energy. Its compact and waterproof motor is surrounded by BLDC Motor Protection to block dust, insects and humidity.

SMART MOTION

Smart Motion gives you 3 kinds of tub movements, including Agitating for removing heavy stains, Rotating for untangling clothes and Swing to minimize fabric damage.

JET SPRAY+

No Rubbing. No Scrubbing. LG's Top Load Washing Machine ensures a completely hands-free wash.

SMART INVERTER. SMART CHOICE.

Your washing machine stays with you for more than 10 years. Make sure it comes out strong in 3 key tests.

• Energy Saving • Washing Performance • Durability

LG Washing Machine comes with Smart Inverter technology that gives you:

New Compact & Waterproof Motor

Quiet & Durable Smart Inverter Motor

Noise ↓

Vibration ↓

Durability ↑

SOFT CLOSING & WIDE DIAMOND GLASS DOOR

Safe, convenient and noise-reducing.

Shock-resistant, anti-scratch and wide view.

Punch+ 3

Punch+ 3 creates water streams in vertical direction which mixes laundry up and down repeatedly for an even washing result.

Smart Diagnosis™

Smart Diagnosis™ is world's first technology that makes it possible to reduce service calls and also saves time and money.

EASY

No need to explain product failure

FAST

Instant diagnosis & measures

SAVE

Save on service cost-effective

5-STAR WASHING MACHINES

LG Washing Machines qualify the norms of Bureau of Energy Efficiency of India with 5-Star Ratings (Labels). Created with the best technology, our wide range of washing machines not only saves water and electricity, but also provides the best washing quality.

BETTER WASHING WITH TurboDrum™

TurboDrum™

TurboDrum™ enables the most powerful wash and removes the toughest dirt through strong water stream of rotating drum and pulsator in the opposite direction.

A FULLY-AUTOMATIC WASHING MACHINE FOR HANDS-FREE WASH

The revolutionary in-built Jet Spray+ with its powerful water spray washes off dirt and excess detergent, giving you the best wash possible without the use of hands. Now your hands will remain healthy and beautiful forever.

Presenting India's 1st Washing Machine with

Jet Spray+

No Rubbing. No Scrubbing.

Key Benefits:

SAVE 70% WATER
per wash cycle

SAVE 40% ENERGY
with less cycle time

Wash cycle **LESS THAN 39 MINS.**

3 SMART MOTION

3 kinds of tub movements controlled by Smart Inverter, provide enhanced washing performance along with better care of clothes.

Powerful Washing
Removes heavy stains by creating powerful water stream.

Tangle Free
Untangles clothes at the end of washing and rinsing cycle by shortly changing spin direction.

Delicate Wash
Minimizes fabric damage by moving clothes gently, especially for delicates.

PERFECT WASH WITH A PERFECT-LOOKING MACHINE.

ROLLER JET PULSATOR

It rotates the clothes effectively and washes out every stain while being gentle on them. The roller-case creates friction to effectively remove dust and mites.

RAT AWAY & ANTI-RUST DESIGN

LG's Semi-Automatic Washing Machine comes with a 3 mm strong plastic cover with rat repellent chemical that ensures no harm by rats to your machine. Also, its anti-rust design enhances its durability.

MAGIC WHEELS

With 360-degree Magic Wheels, you can swiftly move and rotate your washing machine in any direction with ease and without any help.

ROLLER JET PULSATOR

Roller Jet Pulsator rotates the clothes effectively & washes out every stain from the clothes, giving you the best washing performance while being gentle on the clothes. The roller-case creates friction to effectively remove dust and mites. This technology propels detergent rich water into every thread of the fabric. It also scrubs your clothes effectively, resulting in a better quality wash.

RAT AWAY TECHNOLOGY BETTER PROTECTION. ENHANCED DURABILITY.

The Rat Away Technology comes with a 3 mm strong plastic cover with rat repellent chemical that ensures no harm by rats to your machine. Now don't worry about rats damaging your washing machine by cutting internal wires which in turn affects the durability & performance.

Benefits of Rat Away Technology

Less damage
in machine by

Better **SAVINGS**
with low maintenance
cost

The 3 Wash Programs add delight to your washing experience. With gentle, normal and strong wash programs, the machine caters to a diverse range of washing with utmost ease.

1. GENTLE

In Gentle Wash Program, the clothes' agitation and movement is slow. This program is used to wash delicate and less soiled clothes, so that there is no damage to the cloth fabric.

2. NORMAL

In Normal Wash Program, the clothes' agitation and movement is long and fast. This program is used to wash soiled, dirty and sweaty cottons and linen fabrics.

3. STRONG

In Strong Wash Program, the clothes' agitation and movement is very long and rigorous, but it still works without causing any any damage to the cloth fabric. This program is used to wash heavily soiled and dirty clothes, including jeans fabric etc.

SOAK

The machine's unique soak process soaks clothes in a concentrated detergent solution to help loosen tough dirt particles.

WIND JET DRY

Wind Jet Dry has been designed to remove the remaining moisture on laundry and inside the washing machine. When the Spin Tub rotates at high RPM, the air flows into the tub and circulates to remove water. This circulation of air through air vents dries the clothes.

5-STAR WASHING MACHINES

LG Washing Machines qualify the norms of Bureau of Energy Efficiency of India with 5-Star Ratings (Labels). Created with the best technology, our wide range of washing machines not only saves water and electricity, but also provides the best washing quality.
